September 25, 2020

To: Property Owners/Residents/Business Owners

The Port of Kennewick has contracted Lakeland Restoration, LLC to perform an herbicide treatment to control aquatic vegetation. The treatment will occur on or between October 5th- November 30th, 2020.

In order to help prevent fragmentation, please DO NOT cut, rake or hand-pull plants prior to treatment.

Product(s) planned for aquatic use: Diquat, Flumioxazin and Aquathol K

Swimming Restrictions: It has been advised that no swimming occur within the treated areas(s) during or for 24 hours following treatment.

Drinking Water Restrictions: Do not use water from treatment until approved assay result is .1ppm of Aquathol.

Irrigation Restrictions Turf and Landscape Ornamentals: Do not use water from treatment area for 3 days.

Irrigation Restrictions Food Crops and Production Ornamentals: Do not use water from treatment area for 5 days

Stock Water Restrictions: Do not use water from treatment area for 1 day.

There is NO Restriction for fishing.

Details of treatment time and the end of use restrictions will be announced at (877) 273-6674 or www.lakelandrs.com. To access information from the website on this project, go to the bulletin board, click projects and finally click Port of Kennewick.

This application will involve the use of airboats. Please remove items from docks such as lawn chairs, flower pots, personal/recreational flotation devices, etc.

Sincerely,

Luke Huffman, Managing Member
